PROGRAM SERVICE STATEMENT

Mark and Renee' Carter propose to serve the community of Miramar Beach and South Walton County with a diverse array of programming to deal with several "key" issues of local concern. Local news and public affairs programming is planned in both short and long program format to cover many issues of local priority for this growing, beachfront community. Some of the main issues of concern for Miramar Beach residents include growth management of sensitive beachfront areas, future development of Topsail Hill and the other 11,000 acres of real estate adjacent to Miramar Beach that is now in Resolution Trust Corporation control, construction and maintenance of new roads for residential areas, better representation in county government and more control on where the money is spent, an improved county public schools system with the new elementary school approved by the State of Florida for construction south of Choctawhatchee Bay to be built within close proximity to Miramar Beach, further enhancement of the local tourist industry with more emphasis on Miramar Beach and South Walton County as a year-round tourist destination, and the creation of new industry and more jobs for the youth of the area. In addition, special programming would be provided in the case of a major hurricane through the proposal of auxillary power at the studio and transmitter site. Much needed emergency information would be coordinated through a local Radio Hurricane Alert Action Plan involving both the Walton County Civil Defense office in DeFuniak Springs and local emergency management personnel.

(e) If authorization pursuant to 47 C.F.R. Section 73.215 is requested, attach as an Exhibit a complete engineering study to establish the lack of prohibited overlap of contours involving affected stations. The engineering study must include the following:

Exhibit No.
N/A

- (1) Protected and interfering contours, in all directions (360°), for the proposed operation.
- (2) Protected and interfering contours, over pertinent arcs, of all short-spaced assignments, applications and allotments, including a plot showing each transmitter location, with identifying call letters or file numbers, and indication of whether facility is operating or proposed. For vacant allotments, use the reference coordinates as the transmitter location.
- (3) When necessary to show more detail, an additional allocation study utilizing a map with a larger scale to clearly show prohibited overlap will not occur.
- (4) A scale of kilometers and properly labeled longitude and latitude lines, shown across the entire exhibit(s). Sufficient lines should be shown so that the location of the sites may be verified.
- (5) The official title(s) of the map(s) used in the exhibit(s).

14. Are there: (a) within 60 meters of the proposed antenna, any proposed or authorized FM or TV transmitters, or any nonbroadcast (except citizens band or amateur) radio stations; or (b) within the blanketing contour, any established commercial or government receiving stations, cable head-end facilities, or populated areas; or (c) within ten (10) kilometers of the proposed antenna, any proposed or authorized FM or TV transmitters which may produce receiver-induced intermodulation interference?

☒ Yes ☐ No
